# Water extraction per month in the distribution areas of Veitur Utilities in 2024

Granting everyone access to healthy potable water with negligible outages is one of the prerequisites for a healthy population and flourishing economic activity in a modern society, see the sustainable development goals of the United Nations.

# Microbes and chemical composition of potable water in the capital area in 2024

Reykjavík's Department of Environment and Planning (RDEP) regularly collects samples to monitor water quality. Samples are also collected for a complete chemical composition analysis.
